

Make some Egg Box Blossom

You will need:

- ❖ Egg Box
- ❖ Twig from a tree
- ❖ Three long pipe cleaners
- ❖ Scissors

Cut up the bottom of the egg box to create 6 individual eggcups.

Slightly trim around the cups so that they are an even height all around.

Make a small hole in the centre of the bottom of the eggcups.

In the corners of the eggcups, make a small cut, then partially fold out the panels. This will form your flower petals.

Trim a small bit off each corner of the petals to make them curved shapes.

Cut each pipe cleaner in half, then insert one piece into each egg cup, folding the end over so it does not fall out. You now have six flowers.

Fix a flower to the twig with the long end of the “stem” of the pipe cleaner, by twisting around the twig.

Attach all the remaining flowers to the twig and your egg box blossom is ready to display.

Why not try painting some of the egg cups to create colourful blossoms?
